Subject: Spontaneously Applying to an Accenture Career.

Dear Sirs,

My name is Jorge Sabino and I hereby present myself and my wish to work with Accenture.

Having finished the first cycle of *Mestrado Integrado em Engenharia Física Tecnológica* (MEFT) at *Instituto Superior Técnico* (IST), I have worked as a research fellow to *Laboratório de Instrumentação e Física Experimental de Partículas* (LIP) and to *Campus Tecnológico Nuclear* (CTN). In the latter I developed the work on semiconductor materials that will be discussed in my master thesis due to September, 15th of the present year.

I believe that my learning enthusiasm combined with my aspiration to use my skills as means to optimize systems and resources for the best outcome resolution of any situation could be an asset to Accenture, and a personal realization to me.

Having developed some experience with programing, data acquisition and analysis, mathematics and electronics as tools for interpretation, forecast/planning and implementation of solutions in real systems, I am wistful to bring my work to the purpose of helping any company to rise with success.

I would be the most motivated and realized working with health technologies, however, the wide basis of my education accustomed me to a constant integration of knowledge and skills in order to better decompose any situation into an understandable and standardizable model.

The perspective of continuous self-development with formations and team interaction that Accenture projects as conduct to promote quality and rigor is one of the aspects that brought my attention to this company.

I will await a reply and would gladly present myself to a screening or to further discuss future perspectives and many other relevant issues. For a more careful appreciation of my education, experiences and skills, my curriculum is attached.

Best regards.

Jorge Sabino
